Introduction to Specimen Collection Training Model

~ Using PCR Inspection Method ~

Example of Using the M163 Swallowing Mechanism Model

Insertion of cotton swabs can be seen via the cross-section.
Training that deepens anatomical understanding can be carried out.

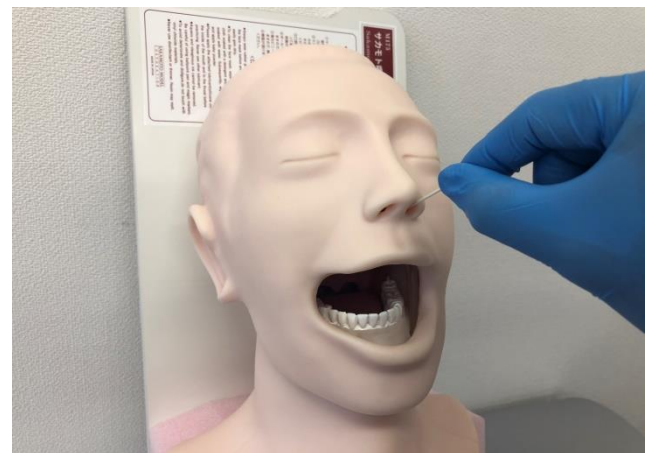

Introduction to M175-1 Transparent Suction Model

Transparent model allows training to be carried out visually.

Example of Using the M175 Sakamoto suction Simulator

Simulated sputum can be used to carry out specimen collection training with greater reality.

Connecting education with medical worksites
