- Accessories/Arm model with injection pad ×2, Tank with integrated pump, AC adapter, Vein and nerve sheet ×2, Spare stopper cap ×3, Cup

A high-end model that allows you to freely reproduce the dilation of blood vessels

Features

Extremely durable pad with blood vessel dilating function

Just by pressing the button on the tank-integrated pump, you can freely reproduce the dilation of blood vessels. No water leaks even after puncturing 10,000 times. (Based on our test)

Normal time

When angry

Practice

The injection pad has been developed and included to allow training in a variety of different intravenous injection procedures. Of course it can be secured with tape, and backflow checking is also OK. The accessory sheet can also be fitted to make it ideal for acquiring knowledge of anatomy too.

Intravenous injections

Intravenous drip

blood sampling

Vacuum blood collection tube

Vein and nerve sheet fitting
